ADVANCED TECHNOLOGY
INCREDIBLE FEELINGS

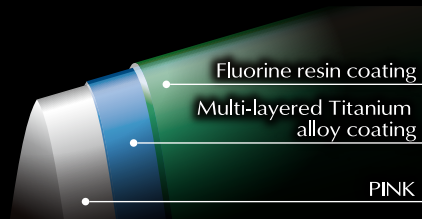

IFIT

5BLADE FOR SMOOTH SHAVING

Titanium coated 5-blade with our latest PINK & NCAT Technology brings incredible closeness with longer lasting performance.

KAI Feature

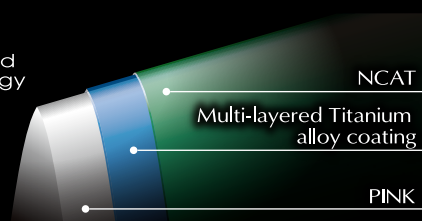

Harder by 2.8 times (than our conventional blade) Sets a new standard in blade hardness

Innovative "PINK" special blade-hardening technology has evolved shaving performance. The blade is 2.8 times harder. This reduces the risk of cuts and dramatically lessens skin damage.

Multi-layered coating makes the edge contact with skin even smoother

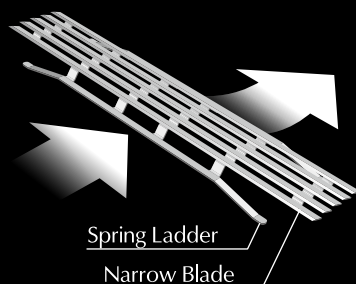

The blade has special titanium and fluorine resin coatings which provide smooth shaving for sensitive skin.

NCAT is our brand new thinner fluorine resin coating technology, reducing the resistance to the skin by 20% compared with our conventional method.

NCAT provides better shaving performance from the 1st use.

Narrow Blade

Unique multi narrow blades structure

The combination of narrow blades and the spring ladder frame in unique structure provides;

- Excellent rinsing performance
- Comfortable and gentle edge contact on skin

About KAI Group

World Wide Network of KAI Group

A world map with red dots indicating KAI Group locations. Lines connect these dots to photos of regional offices. The locations shown are: kai U.S.A. ltd. (Portland, Oregon), kai industries co.,ltd. (Sekai, Japan), kai corporation (Tokyo, Japan), Universal Razor Industries, LLC (Los Angeles, U.S.A.), kai Europe GmbH (Solingen, Germany), kai vietnam co., ltd. (Hanoi, Vietnam), and shanghai kai cutlery co., ltd. (Shanghai, China).

Tokyo, Japan: kai corporation
 Seki, Japan: kai industries co.,ltd.
 Seoul, Korea: kai jirushi korea corp.
 Shanghai, China: shanghai kai cutlery co.,ltd.
 Guangzhou, China: kai R&D (Guangzhou) co.,ltd.
 Hong Kong: kai cutlery (H.K.) ltd.
 Hanoi, Vietnam: kai vietnam co.,ltd.
 Solingen, Germany: kai Europe GmbH
 Oregon, U.S.A.: kai U.S.A. ltd.
 Los Angeles, U.S.A.: Universal Razor Industries, LLC

KAI, the history of cutlery

KAI is a company that currently manufactures, sells, exports and imports more than 10,000 different kinds of cutlery and cutting tools, ranging from kitchen utensils to cosmetic accessories and surgical implements.

KAI started in 1908 as a small pocket-knife factory in the city of Seki, which is known in Japan as the City of Good Swordsmen.

Even though the company has become large, one principle, nokaji (blacksmith's) spirit, has been consistently upheld by KAI. "The nokaji strives to make blades that are suited to the daily lives of people by bringing to bear on the task all his craftsmanship and all his heart."

KAI strives to find an answer to the question: "how can we bring the spirit of the nokaji into the 21st century?"

KAI Group Key Milestones

1908: KAI group started making pocket knives.

1932: Led by Saijiro Endo, 1st president, KAI group started making razor blades.

1951: KAI group started making disposable razors under the leadership of Saijiro Endo Junior, 2nd president.

1970: KAI U.S.A. ltd. was founded in Portland Oregon.

1998: KAI group developed the K3, the world's first triple blade razor.

1999: KAI group started supplying Universal Razor Industries to gain distribution for its razors in the US market.

2008: KAI group developed PINK (Plasma Ion New process by KAI) technology, which improved its razor blades' edge durability (Harder by 2.8 times).

2010: KAI group developed NCAT (Nano Coating Advanced Technology) for better 1st use and more comfortable shaving.

2012: KAI group developed the iFIT the intelligent fitting system.
